Experimental Situation Report

Strong Storms Possible Tuesday, Wednesday

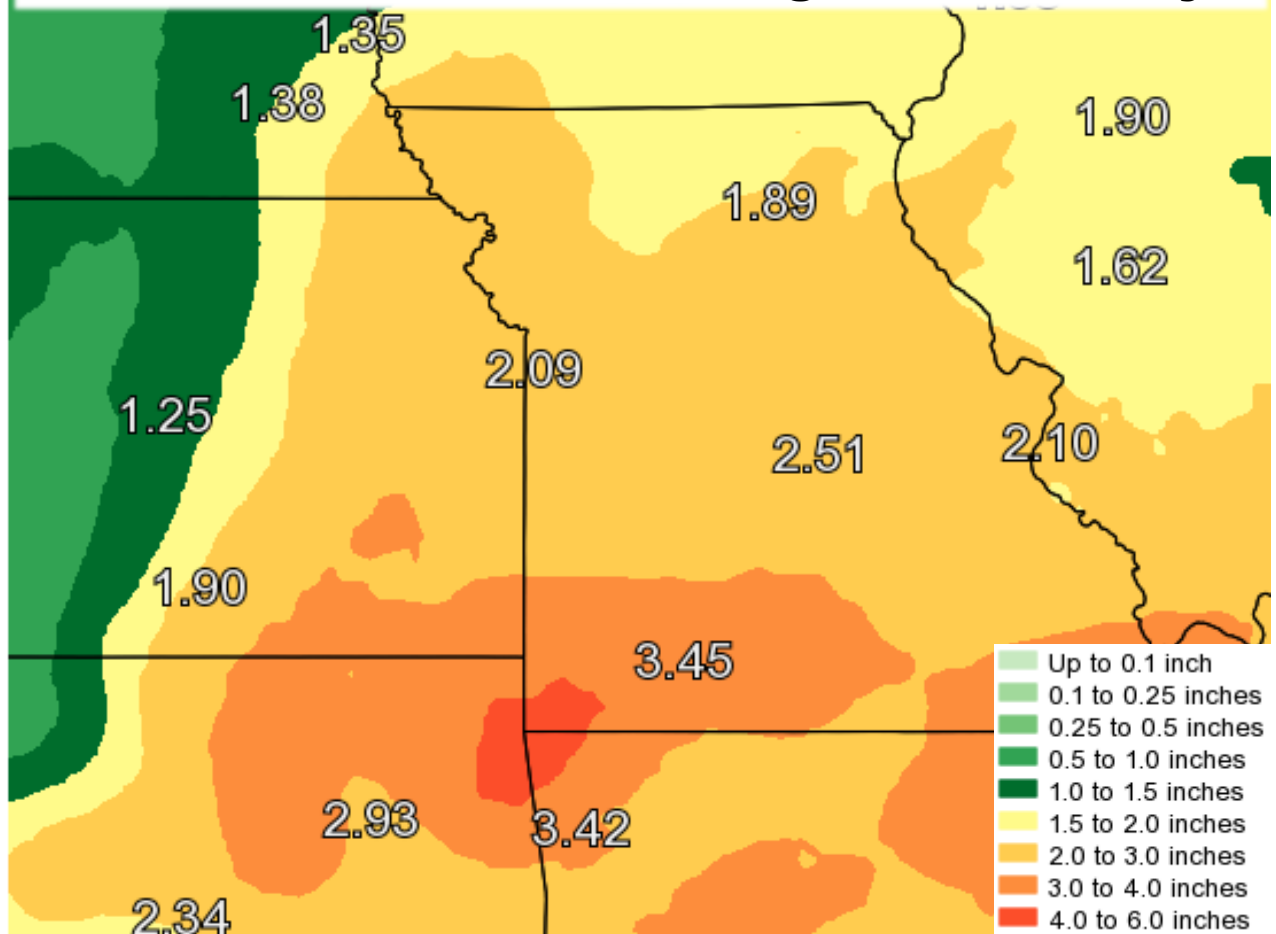

TUESDAY: Showers and thunderstorms are possible across far northern MO Tuesday evening and overnight, with higher chances further north across NE and IA. A few storms may produce marginally severe hail up to 1".

WEDNESDAY: Numerous showers and thunderstorms are expected along a cold front which will enter northwest MO and north central KS just before sunset, the I-35 corridor later in the evening and into central and northeast MO shortly after midnight. Some storms may be severe with large hail and damaging winds in the evening, especially from northeast KS into north central MO.

LATER THIS WEEK: Widespread rainfall is possible Friday and Saturday with locally heavy rainfall possible (forecast rainfall amounts on next page).
